

|   |                       |
|---|-----------------------|
| Number of SNPs from region in original dataset                    | 29                    |
| Number of SNPs from region in HapMap phase II dataset             | 140                   |
| Number of SNPs with allelic dosage squared correlation $\geq 0.8$ | 41                    |
| Number of above SNPs with p-value $< 0.05$                        | 9                     |
| Minimum p-value from above  | $6.18 \times 10^{-4}$ |
