The publishing process relies on the work of volunteer reviewers and evaluating the interdisciplinary papers published in G-Cubed can be challenging.

As editors and associated editors, we would like to express our appreciation to all reviewers and would like to acknowledge them in this editorial.

G-Cubed published 254 manuscripts out of 434 submissions in 2022, thanks to the efforts of 668 dedicated reviewers. Their names are listed below and names in *italics* are those who provided three or more reviews.

A big thank you from the G-Cubed team!
